Abstract:

Abstract The hybodontiform shark-like *Strophodus* was a large durophagous predator with highly specialized crushing-type dentition that mainly inhabited Mesozoic marine environments for more than 130 million years, with a fossil record spanning from the Middle Triassic to the Lower Cretaceous. *Strophodus* was

Submission Agreement for Zurich Open Repository and Archive (ZORA)

By self-archiving this collection of files and associated bibliographic metadata, I grant Zurich Open Repository and Archive (ZORA) the right to store them and make them permanently and freely available online to the public.

I acknowledge that the ZORA editorial team may temporarily or permanently restrict access to the full text (PDF) based on copyright and embargo conditions.

Specific Requirements for Dissertations and Master's Theses:

Dissertations and master's theses are included in ZORA under the following conditions:

- The content quality check has been successfully completed by the supervisor.
- A plagiarism check has been carried out and appropriate measures to avoid plagiarism have been taken: [Plagiarism Check](#)

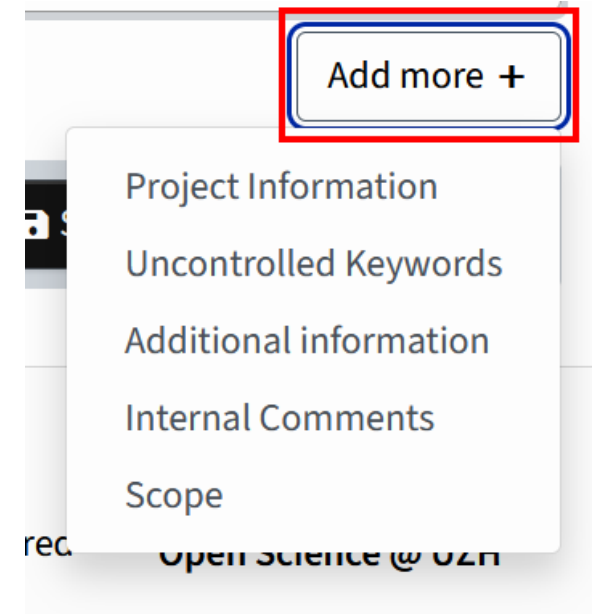

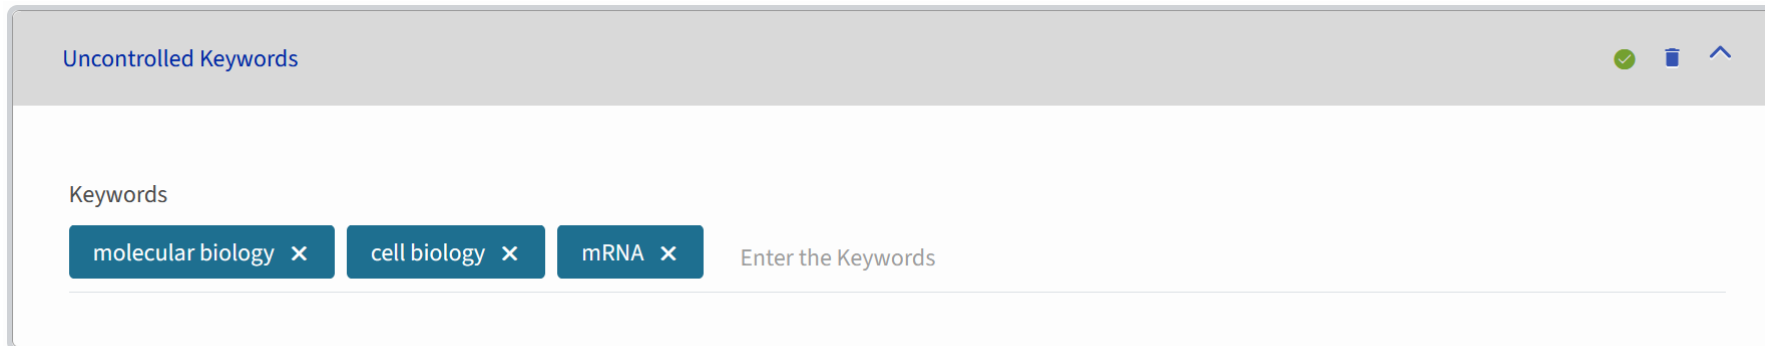

☒ I confirm the license above

Import publications with ORCID

Some sections are hidden by default. To display them, scroll to the bottom of the submission form and click «Add more». Here you can select the section(s) you want to add.

Uncontrolled keywords

- Add new keyword: enter and confirm with «Enter»
- It is also possible to add a list of keywords. This only works if the keywords are separated by commas.

Import publications with ORCID

At the bottom of the submission form, it is possible to :

- **Discard** = deletes the entry
- **Save** = saves and remains in the form (it has an auto-save function, saving automatically every minute)
- **Save for later** = saves and closes the form (entry can be edited again later)
- **Deposit** = sends the record to the review process. There it will be checked and approved by the central ZORA editorial team or the ZORA editors.

Import publications with ORCID

Your submissions can have three different status:

Archived: the publication is in the live archive.

Workflow: the publication is in the review process and will be checked by an editor before being published in the live archive.

Workspace: the publication hasn't been deposited yet and you can still edit it before depositing it.

Import publications with ORCID

If you try to import a publication that is already in the live archive, you will get a duplicate message.

By clicking on the message “The system has identified some potential duplicates”, you can add your institute / clinic to the record.
